BE HAPPY ENJOY GRATITUDE from DOING GOOD and BEING KIND.
COUNT and ENJOY YOUR BLESSINGS. CAUSE NO HARM
Gives the most Happiness. Be a saving light and friendly help in the darkness.

Be Kind Do Good Cause no harm
What you would not want done to yourself
Don't do it to others. = Cause no harm.
This is the universal civilization standard.
If we expect it from all Enforce it by law, it
will protect all, stop harm, make peace,
and gives the most happiness for all.

HEALTH SAFETY SURVIVAL

Those who value those should **be ever aware of threats around them and take defensive actions.** First avoid risky places, situations and potentially dangerous people. Outrageous example: walking on busy street or rail road wearing headphones. But how many consider avoiding crowds during severe flu season or just ordering needed items for delivery.

Avoid arguments and altercations because in today's world there are many mentally unstable gun carriers with an emotional hair trigger.

Make safety and health a daily priority. Dr Daniel G. Amen author of Change Your Brain, Change Your Life, has expert health advice, gives the following **tips for brain and body health**: **Eat a good diet, lots of fruits, vegetables, nuts, lean meats, fish and water**. **Avoid sugar, alcohol, smoking, drugs, excessive caffeine, and excessive eating. Get lots of exercise and 7-8 hours of sleep a night**.

Maintain a healthy weight. **Make good, consistent, thoughtful, conscientious decisions. Keep your surroundings free of toxins**.

Seek out good health and exercise programs.

Good YouTube videos

For SURVIVAL get this best family book and have everyone in the family learn from it. That book is The **Scout Handbook** as **has life saving, first aid, survival, leadership, anti drug, good values, needed social skills, kids need today**,

Get spiral-bound 488p because it is always available. Goes into car/room so kids can read it when bored. Gets kids off fone learning valuable needed life knowledge. It is a needed Family book because it shows youth good ideals, and other needed things. **It also tells them how to deal with common problems like friends urging them to try drugs.** They may accept good advice from a book but not always from an adult.

Scouting is lifesaving. **Scouts learn things that save lives sometimes even family members lives**. Scouts **learn survival, leadership** & many **needed life skills**. Scouting **can be free.** Be an **independent scout** for free. see scouthandbook.fyi or **scoutingbyfone.fyi**

GETTING ALONG WELL WITH OTHERS

We live in a world surrounded by people. Getting along with them is a necessity.

I have reviewed hundreds of pages of research. "How to Win Friends and Influence People" by Dale Carnegie, teaches to genuinely focus on others, make them feel important through, **compliments, and good listening, while avoiding criticism and arguments to foster positive relationships** and influence. He advocates: smiling, remembering names, being a good listener, talking about their interests, praising improvements, and seeing things from their perspective to make them happy to do what you want.

I add: Always **do to others what you would want them to do to you.** (Golden Rule) **Being friendly, pleasant greetings,**

kind words. Summarize what they say. Establish rapport, find common ground, and interests. **Avoid criticism** and **negativity**. **Nobody likes complainers**. In disagreements **work on common interests and solutions**. Use diplomacy and fact finding. What goes around comes back around. Your actions may come back to you. Caring makes everything easier.

The most important words in human relations: I ADMIT I MADE A MISTAKE, I AM PROUD OF YOU, WHAT IS YOUR OPINION, IF YOU PLEASE, THANK YOU (most important 2 words), **We (the most important word),** I (the LEAST important word) **Put more "We" in your conversations.**

Small minds discuss trivial things waste the gift of time they were given, **accomplish little** leave a **legacy of self only.** Those do littlers are soon forgotten. **Great minds discuss important ideas**, **seek to improve things** for good of all. **Use their time wisely** doing useful things, helping others and the community and

enjoying satisfaction and happiness. Leave a good caring legacy
of good deeds because life ends too soon sometimes expectantly.

We honor them with gratitude.

Avoid bugging people with your problems, or long stories as most are busy. Better to be positive

Be a friend be helpful not a bother.

Diplomacy gets you far more than complaining or rage. Nobody likes complainers.

Happiness research

The Secret to a Happy Life Lessons from 8 Decades of Research Robert Waldinger A TED TALK. See https://www.youtube.com/watch?v=oHv6vTKD6lg

An Experiment in Gratitude The Science of Happiness https://www.youtube.com/watch?v=e9UVAafNvm4

7 Ways to Be Happier, According to Yale Professor of Well-Being https://www.youtube.com/watch?v=gYeHV_nA36c

The Simple Secret of Being Happier Tia Graham TED.

"You, Happier" by Daniel G. Amen is a great book of scientific and medical research on how to be happy. See his tips on p 6.

Science shows counting your blessings actually brings you happiness Enjoy beauty and life. Smell the flowers.

Self actualization see references scientific psychological studies like those of Abraham Maslow also hierarchy of needs give us scientific clues to happiness.

BEST SECRETS of SUCCESS

Discover what you like to do and do it for a happy life.

Happiness is free It is a state of mind.

If you Fail to Plan you are Planning to Fail. You will never have this day again so make it count.

Live in reality not fantasy. Realize that we all have limited time, a finite number of heart beats just like the grains of sand in an hour glass timer. We are all just a few heartbeats away from the night of death which

comes too soon and unexpectedly so it is best to use our time wisely.

Most live as if they will never die and waste the gift of time they are given. No one knows for sure if there is life after death. All evidence points to death being like sleep but we don't wake up and our body dies.

"**Be a free thinker and don't accept everything you hear as truth. Be critical and evaluate what you believe in."Aristotle.**

Seek truth do good Grandpa's experience says:

Practice Safety Think first.

Scout Motto: Be Prepared Best to light a Light than stumble in darkness.

James Allen in As a Man Thinketh said: A **wise person controls his thoughts** and thereby his actions; spends more time in study and thought, questions most everything; tries to find the truth; makes the best use of his time; avoids time traps like entertainment. A wise person knows that **worry** is a waste of time and **success, happiness,** love, some suffering health and actions **stem from thought**. Character is the sum of ones thoughts. **You are and do what you think. To change**

yourself change your thinking. **You have freedom to choose your thoughts.**

If you want success you must think success. You are completely responsible for your own thoughts. You can't blame anyone else. As you continue to think so you will remain.

You are limited only by the thoughts you yourself choose.

Wise ones organize, prioritize control, & discipline their thinking. **Reject negative, lustful,** irrational, **emotional**, **worrisome**, **thoughts**. Many problems are caused by poor attitude or poor management. **Many problems** are **caused by failing to get enough information, and** by **insufficient thinking.** Do what you can one step at a time. When angry WAIT count to 100 before you speak. Think of the consequences first. To test ideas ask: **Is it the right thing to do?** Is it **fair** to all? Be observant. **Look for opportunities**.

Be skeptical. Ask is it actual, factual up to date all inclusive. Active effective listening is a major success tool.

Listen intently and repeat the meaning. Ask if you got that correct. Ask more questions to gain understanding. Most problems are caused by attitude or failing to get

all of the needed pertinent info. **Learn from history and the experience of others. Think for yourself. If you don't others will at your expense**. Make it a **priority to Be vigilant** for and deal with **threats. People should be loved** and things should be used. Sadly people are being used and things are being loved too much. **What really matters** is not what we bought or accumulated, owned, or had in the bank. But what we **did**, **built**, **shared**, **accomplished**, gave and not our personal competence but our **character**; and not our success but our significance**, a life that mattered**. Live **a life that did something useful**, had value, **was a friend**, **cared**, **was kind and did good. Pessimists complain about the wind. Optimists expect it to change. Leaders adjust the sails**. You make it happen or not. So many don't even try. **If it is to be it's up to me.** Be bold and sometimes mighty forces come to your aid. Try asking and you might be given. The longest journey starts with a single step. **Computers and humans need truthful data because otherwise garbage in gives garbage out**. There **is a flood of false information and half truths** out there.

How do we find good info? Ask pertinent questions that will find the truth and all sides of an issue. **Seek accurate sources.** Don't trust hearsay or uneducated opinions.

One of the wisest and smartest persons that ever lived was Benjamin Franklin born 1706

His works abound in wisdom **Ben Franklin's wise Maxims: Speak only what will benefit others or yourself.**

Let all things have their places.
(organize, plan)

Let each part of your business have its time.

Resolve to perform what you ought.

Perform without fail what you resolve.

Make no expense but to do good to others or yourself; that is; waste nothing.

Lose no time. Be always employed in something useful. Be Clean in body, clothes and habitation.

Be not disturbed by accidents, or at trifles.

Eat not to dullness, drink not to elevation.

Sincerity: use no hurtful deception.

Justice: wrong no one by causing injuries or omitting your duties. Moderation: avoid extremes, Be Wise and Humble.

Imitate Jesus and Socrates. **Speak no ill of anyone because it makes enemies.** A true friend is the best possession.

Avoid assertive criticism rather say

"It appears to me or **If I am not mistaken**" Ask Questions. Be early to rise. **Ask What Good can I do today? Plan**, **Set time aside for thinking, reading**, and for work. **Evaluate actions. Get adequate sleep**. The greatest good is to do good for the community.

Ben Franklin said **Dost thou love life? Then do not squander time, for that's the stuff life is made of. Lost time is never found again.** Waste not life as in the grave will be sleeping enough. **The Noblest Question in the world is What good can I do in it.**

The greatest good is to do good for the community. Every morning ask What good can I do today?

What it is Serving God, is Doing Good to man

Do good to thy friend to keep him, to thy enemy to gain him.

Tis easier to prevent bad habits them to break them. **Who is strong? He that can conquer his bad habits. The sleeping fox catches no birds. Up!**

A small leak will sink a great ship. Love your enemies, for they would tell your faults. Good sense all need, few have.

Thou can'st not joke and enemy into a friend, but thou can a friend into an enemy.

Think before you speak.

Don't throw stones at your neighbors, if your have windows.

Want a faithful servant? Serve yourself. **God helps them that help themselves.**

You ought to be an honor to your family.

Glass, China, **and reputation, are easily cracked and never well mended**. If you do what you should not, you must hear what you would not,

Well done is better than well said. When there's no law, there's no bread.

Great talkers, little doers.

A penny saved is a penny earned

Keep thy shop and thy shop will keep thee.

Search others for their virtues, thyself for thy vices.

Borrowing will go a Sorrowing

Nothing is so popular as goodness.

Early to bed and early to rise, makes a man healthy, wealthy, and wise.

Diligence is the mother of good luck and overcomes difficulty.

Tis easier to suppress the first desire, than to satisfy all that follow It. Let my discontents be secrets. Blessed is he who expects nothing, for he will never be disappointed.

Haste makes waste. Anger is never without a reason, but seldom without a good one. He who falls in love with himself will have no rivals. When the Wells dry we know the worth of water. **Forewarned is Forearmed** Death takes no bribes.

One Today equals two tomorrows Half Wits talk much but say little

Many a man thinks he's buying pleasure when he's really selling himself a slave to it.

Eat to live, live not to eat.

The way to see faith is to shut the eye of reason.

To lengthen thy life, lessen thy meals.

Observe all men: thyself most.

Happy Wife, Happy Life Better slip with the foot then the Tongue.

Fish and visitors stink after three days. Would you live with ease, do what you ought, and not what you please.

Those who are wrapped up in themselves make small packages.

Leisure time is a good time for doing something useful

Diligence is the mother of Good Luck Industry, Perseverance, Frugality make fortune yield.

Hide not your Talents, they for Use were made, What good is a sundial if it sets in the shade?

A lie stands on one leg, truth on two.
Whatever's begun in anger, ends in **shame**.
Listen to reason or she'll hit you later.
The things which hurt, Instruct.
A soft Tongue may strike hard.
Blame all and praise all are two blockheads.
Paintings & fightings are best seen at a distance.

Success is accomplishing a worthy goal.
The most satisfying successes are not about money. (contrary to what most believe.) Many who won big lottery money ended up very unhappy. Sure money helps us but **happiness is more about satisfaction.** Money is only a tool. To those who make it the end goal it gives false happiness. Many do not discover the real causes of happiness. Some of the richest people in the world have discovered **there is more happiness in doing things they like to do and in helping others, maintaining good relationships, solving problems and especially in the gratitude they get in return.**
Nothing is as important as this day and the Love and Life in it.
Look for opportunities. Be your own salesman of yourself.

First impressions are priceless.

Today is a new day. God gave me this day to use as I will. To waste it, or use it for good. What I do with this day is important, because I have given one day of my life for it. When tomorrow comes, today will be gone forever. Remember I paid one day of my life for it.

Hope I will not regret the price I paid for it.

On many a grave headstones glisten of those who heard but wouldn't listen.

Sometimes grave stones show wisdom.

Be thankful for what you have-Life. Do the most good while you can before it is too late.

Use time wisely waste it not for all too soon this (the grave) will be your lot.

The worst evil of all is uncaringness.

Wise advice: **Be a free thinker. Be critical and evaluate what you see, hear and believe. Question everything and Think.** You are the captain of your ship, be the leader. **You are what you think, control your thoughts.** Spend more time in thought and reading. **Seek the truth wherever it leads. Your thoughts lead to happiness, success, and health.**

To be a success Think Success Make a plan, work the plan, evaluate, make

corrections, seek wise advice. The journey of life is made of many little decisions. **Little is accomplished without effort.**

If it is to be it is up to me.

Kindness doesn't cost anything.

Kindness and being a Friend are the most valuable gifts you can give.

Leave a legacy of good deeds and useful accomplishments because you can take nothing with you when you die, which happens too soon, often unexpectedly. **Time is valuable and priceless**. Life is short. **Live each day as if it were your last** as it could be. **Think Freely and positively**, out of the box, **Use the imagination tool, seek the truth**, **follow science**, and **ask enough questions to get full understanding**.

Question everything.

Don't waste your time as it is valuable and priceless. You can never get back a wasted day or life. Time is worth more than money, which is only a tool and should not be the end goal as better happiness comes from satisfaction and gratitude of doing useful deeds and helping others and acts of kindness. **Live in reality not fantasy. Waste not time** on triviality, or worry.

Be alert, for threats and make dealing them high priority. **Think more. Learn from the experiences of others**. As much as possible: **Live and let live, do good, be kind, be happy, friendly, cheerful**, brave, courteous, trustworthy, honorable, respectful, thoughtful, considerate, responsible, grateful, thankful, and above all loving. Avoid killing and do so only when other means fail to stop attackers and harmers. **Avoid causing harm by actions or inaction. Fight evil**. **Stand up for what is right**. **Practice and use Wisdom**, **listen more than speak**. **Avoid negative people**, toxic environments, bad situations, drugs, anger, acting on emotion, lust, irrationality, **worry and negative thoughts**. **Enjoy beautiful places** and things and nice people. **Even a smile and a few nice words can brighten a day, sometimes even save a life**. Your mind is like a garden your thoughts are like seeds. You can grow flowers or you can grow weeds. All of the flowers of tomorrow are in the seeds of Today. We need to think good positive useful thoughts to do good for all for a better today. **Resolve issues for the benefit of all with discussion,** diplomacy

and finding the facts rather than violence, is always best.

Use the Peace Hand instead of handshaking to avoid spread of viruses. **Say Be Kind Do Good Cause no Harm** at Greeting because these are most needed. Know someone who is lonely, depressed or so sad they think life is not worth living anymore? When we are overcome with emotions this clouds our good sense. **One half of us nowadays are depressed & lonely**. If you end your life you leave a deep black hole for yourself, your family, and to others who care about you but whom you have not discovered. And there may be several.

First don't let the negative thoughts take over. They are just little things like an ant A N T A Negative Thought. They make you want to end your life. **Ban them** and replace them with positive thoughts. not emotion or fantasy. Better think I may have failed in some things but I have succeeded in other things. I can learn from these. I can look for ways to fix things, better things.

Fools make the mistake of turning to drugs to get high. It is best to **just say no.** Many **drugs get a hold of you and will not let go. Many people die because they tried to get high.**

Drugs **drag you down**. The **best way to get high is by doing useful tasks and from the satisfaction, and gratitude of others for useful things you did** or are doing for good and **counting your blessings**, the things you are **grateful** for, **gives happiness**.

It could always be worse. **Listening to music you like often brings happiness** most anytime anywhere.

It is all in your mind. Sometimes we think people don't care. **So what,** you don't have to please them. Many only care about themselves. **But there are many others who do care**. You need to find them and be happier but that won't happen if you don't try. **Go out to visit coffee shops** or other gathering places often. Soon you will meet nice folks who could be friends. **Avoid bars** because many there are trying to solve their problems with alcohol which does not work well. Also because they attract those prone to solving problems with violence or drugs which can lead you into worse situations.

Don't waste your time on being angry or sad when you can go out and enjoy the many nice things and **joys Life has to offer if you just seek them**.

Think positive happy thoughts because being

happy is **more enjoyable and is free and more fun** and attracts friends. **This is backed by scientific studies.** Think Positive, avoid negative thoughts. Best happiness happens when we think positive, are grateful, think happy, Be Kind, Do Good get your mind off of it.

We are given the gift of life every day. We can use it wisely or waste it away. The choice is ours we can say
But we can never get back a wasted day.

Friendship, Kindness and love are the most valuable gifts you can give and are free.

A reliable friend is a valuable asset. **And we should be a reliable friend in return**.
Kindness costs nothing but may mean everything.

Kindness is the most valuable gift you can give yet costs nothing

It is wise to seek, build, and maintain good friendships.

We took an enjoyable Amtrak train across the USA. We **enjoyed beautiful scenery** especially from the dining car with good food and service. We enjoyed the Grand Canyon for a week.

Many places have to be experienced to be fully enjoyed like **Havasu Falls**. **Make it a plan to travel some in your life.**

Mere pictures barely begin to show the beauty and awe. Best seen in personal full life reality. **Visit events & National Parks very enjoyable.** America the Beautiful. O beautiful for spacious skies, For amber waves of grain, For purple mountain majesties, Above the fruited plain, America, America,

God shed His grace on thee, And crown thy good with brotherhood, From sea to shining sea. Seek to **Be in a happy place with things you love and enjoy festivals and events.**

"And I'm proud to be an American where at least I know I'm free and I won't forget the men who died who gave that right to me. And I gladly stand up next to you and defend her still today. Cuz there ain't no doubt I love this land. God Bless the USA. **Take time to Think, read, be informed. Love, be positive, cheerful, friendly make things go easier and is the best way to get along with others.**

Enjoy. **Music gives much happiness** but because so many songs are lacking in positive needed ideas I felt need to create these most needed lyrics and to find a **basic tune everyone knows. Twinkle Little Star won**. Now I am seeking some children to sing it.

Most Needed Song

Love and kind-ness are the best, And give the most hap-pi-ness.
Be Kind Do Good Cause no Harm, Gives the world a helping Charm.

Be kind, do good, eve-ry day, In your work and in your play.
Do to others as you'd do, As if same were done to you. **Better to light a lit-tle light, Than to stumble in dark of night.**
Science finds truth to help what may, Bring-ing us a better way.

Friends are jewels - rare and true, I will be that friend to you.
Cause no harm in what you do, Speak only words that's good and true.

Free-dom is not ev-ver free, Man-y died for you and me.
Be Kind Do Good Cause no Harm, Be Kind Do Good Cause no Harm.

See my video on my Facebook but is not yet by children singing.
If it catches on use any funds for needy children.

Kindness is like ice cream. It's basically the solution to most of the world's problems. Wherever there is a human being there is an opportunity for kindness.

Humans are humane sociopaths aren't.

Look for opportunities To benefit all.

Think of consequences when making decisions that affect others. Ask is it the right and best thing to do. Is it fair to all? Prioritize. Avoid wasting time on the unimportant. Many of us just see death as going to sleep so we don't fear it. We sort of die every night. Each morning we say a thankful prayer for being given another day to do with as we please.

If you **are in** the **least doubt about a decision** or if much emotion is involved it is **best to set it aside** for a while, sleep on it to let the subconscious mind work on it. Since much of the mind is subconscious it is wise to use it. If there is not time than **at least seek calm-wise council** and listen. Take time to ask infinite intelligence what to do. Then listen for the quiet answer that may come when you wait for it and are willing to receive it. Answers usually are found if they are diligently sought.

Search for the best most wise action. Be sure to **consider** all **alternatives** and **possibilities**.

Science shows counting your blessings actually brings you happiness Enjoy beauty and life. Smell the flowers.

BEST IDEAS
GETTING FREE STUFF and more

How about lowering your electric bill. **The Earth gets more energy from the sun every day than mankind can use in a year.** You can have lots of this free energy daily.

Solar panels, shingles solar walls and windows can keep on paying you daily and last for many years.

FREE POWER EASY DO IT YOURSELF

Be independent. Always have free power. Safe 12 volts. Put panels inside by windows or outside. Add a battery-charge controller-inverter unit with USB charger, and 110 AC output. Earth gets thousands of times the energy we need every day free from the sun. Solar panels on roofs, reservoirs and some public land **could give us all free electricity and basic income for all and help the environment by reducing carbon emissions.**

WE COULD HAVE FREE BASIC INCOME

from the sun, if we had solar panels put on public areas, between railroad tracks and have Edison buy that free power instead of generating it at huge fuel expense, **then put that free income into a public fund giving basic income to all.** It will take public pressure on officials to make it happen. We will need this

as Automation and Artificial Intelligence Bots, and robots will replace millions from their jobs. Robots could install solar panels and solar power generating windows, roofs and exterior wall coverings. **All of these could generate free electricity** to be bought by Edison and the **huge profits go to a basic income fund for us all, eliminating poverty once and for all.** We will have to fight big money who will want to make greedy profit from this free energy but they don't own it. **It is the sun's gift to all of us.** With automation taking jobs we need basic income now. We need to press officials to make this happen. **The needs of the many outweigh the greed of the few.**

FREE EDUCATION ANYWHERE IS NOW POSSIBLE. LEARNING IS AN IMPORTANT SUCCESS METHOD. There is lots of free information on most topics available today on the Internet. There are thousands of free learning videos on YouTube and other sites**. ANYONE CAN LEARN** ON THEIR FONE (modern spelling) **ANYTIME IN THEIR SPARE TIME.** There are f**ree online classes at many colleges**.

Many offer financial aid. Like Harvard. Soon AI will enable personalized more efficient learning. Many employers offer on the job training, internships and apprenticeships or reimburse tuition. There are thousands of job openings in skilled trades. **Michigan and many other states have two years of free college.** The military has free training often in specialized areas like nuclear power one cannot get anywhere else. 5,000 scholarships are on **valuableideas.fyi** and **many more online if you search.**

Language misunderstanding **is** a big problem worldwide. **We need to understand each other in emergencies. There is an easy solution.** Except in tourist traps. **88% of the people in world do not understand English** and that is most of the first responders in the world, resulting in lives being lost.

International Vocabulary is the easiest language nickname is Esperanto meaning hope, can be learned in 5 minutes a day. Children should learn this in all schools in the world. Soon most could understand each other around world. It is not meant to replace any language rather just enables fast, easy understanding between languages.

You already know 2,000 words of it already, so you will soon be able to talk with people around the world and also get easy college credits just by taking a test. Learn about it at **easiestlanguage.fyi** or **esperanto.net esperanto-usa.org or lernu.net** We are friendly folks who share a grand idea of world friendship by using a common language. Share ideas with one common easy language. Every year there are conventions with people from many countries no translators are needed. They have a service that allows people to travel to many countries, and stay with local Esperantists who act as guides. This is great for avoiding tourist traps and seeing the world.

Our Environment is changing because of human activity of burning fossil fuels causing increase in **CO_2** Greta Thunberg was the teenager who spoke to the United nations warning them that **science is clear that we need to take action now.** She was mostly ignored and now we have an ecological crisis. Earth now has the hottest days ever, more: melting glaciers soon sea level rise, more severe droughts,

floods, more severe weather. **Rising air temps cause huge amounts of methane to come out of permafrost, increasing Earth temperature even faster making things worse.**

The great Stephen Hawking told us "We are in danger of destroying ourselves." It is now evident that we are in a worsening crisis. **Don't believe big oil and other corporate lies** because they are making huge profits and paying off of politicians around the world. **Listen to science as it seeks and states the truth**. We are nearing a tipping point to the extinction of humans. **Insist leaders take action now on this because** if they don't there will be increasing severe damage and eventual human extinction. Big oil takes billions while Congress and their buddies are getting richer by ignoring this crisis.

We have the technology to create: better affordable vehicles that selfdrive are self powered, so have no fuel cost are super reliable, easy to fix using modular standard universal parts that can be quickly switched out for a workable part. Possible if greedy get out of the way.

They **could sell more if it had an affordable price**. The famous Model T, sold in the millions because it was reliable, low cost, and easy to fix. The rich do better when the workers have more money because workers buy more. And the car makers could still sell their high end cars.

As far as really inexpensive getting around **locally scooters & PEBL a 3 wheeled trike-electric-car are better**. See https://www.youtube.com/watch?v=Uos7H4ZFA48 about the PEBL

A new major scientific breakthrough is the use of both solar and wind to charge electric vehicles both while they are moving and standing still, even in light wind while car is sitting still. This could **mean smaller battery packs, lower car prices**. You will never get stranded for lack of gas or

charging station. **They can also create Flying cars that are self driving. great for traffic or flooded roads**.

They can use free solar power. Better for environment. No taxes.

They will be the car of the future. Go anywhere no road or traffic hassles **No more traffic hassles**.

Coming in future levitating personal vehicles.
Or use a jet suit.

Using simple inexpensive I beams suspended along freeways

Mass Transit

HOW ABOUT FAST SAFE NATION WIDE AFFORDABLE MASS TRANSIT THAT ENDS TRAFFIC HASSLES, never delay due to weather or cancellations, or airport TSA line delay or lack of crew or airplane.

Or road pods same as above but no rail..

Efficient Mass transit privacy Pods suspended on I beams along freeways could eliminate driving and parking hassles and save money. Just sit back relax and enjoy the ride and view. These would be fast, quiet, and run on free solar power. No need to build or maintain new roads. This could give us a nation wide fast transit system better than airlines, **NO FLIGHT CANCELLATIONS, NO PILOT NEEDED** No chance of crash.

Always safe and all are private and under your control at all times. Never have to worry about car repairs, flat tires running out of gas. **Using AI** to manage carpools or trips could save money by allowing neighbors to share rides.

Otherwise robots and bots with AI will be helpful to us, save lives and help with research.

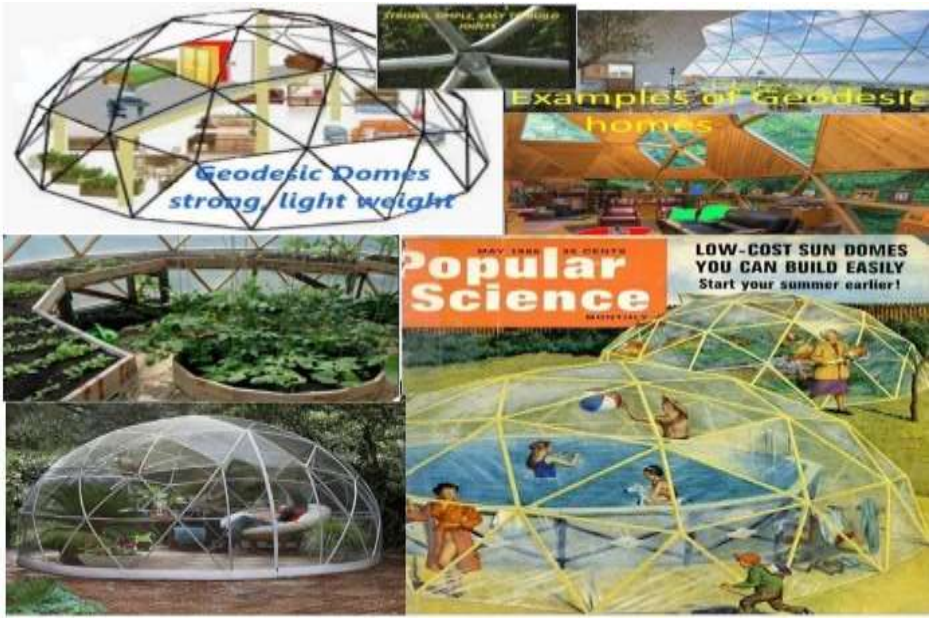
Autonomous vehicles could make our roads much safer, save lives and end traffic hassles.

There is much more that we do not know than we know.

Humankind knows truly little. **You don't know how much you know, until you know how little you know.** My wise grandfather told me that and he was right.

Affordable Housing is desperately needed and can be created by several methods. **First utilize current buildings to create apartments.** Use prefab factory made modules with built in wiring which can be set up without need for skilled labor.

Cities can require a percentage of new housing units for affordable housing. Elton Musk's Boxabl units can be delivered by truck unfolded on to a foundation. Habitat for Humanity and other groups could build units. **Trailer homes can be put on vacant land.** Geodesic domes strong, low cost and easy to build. Metal tubes flattened on end and bolted Anchor frame securely. Cover with clear vinyl or strong reinforced materials. Can be used for greenhouses, sheds, patio super nice homes even tornado shelters. for chicken coop. **music room**, for quiet in the rest home, bedroom or. **Jacuzzi.**



The most knowledgeable doctor in the world is an IBM computer named Watson who can in seconds evaluate every new study and treatment outcome and tests and make superior recommendations based all something no human can do.

In the future because of the doctor shortage your doctor may be Dr Watson in your nurse's hand.

95% of the Universe is dark energy **of which we know almost nothing** and the same for the para normal, spiritual,

and perhaps parallel worlds. Nikola Tesla thought in terms of energy, frequency, and vibration. He envisioned **cars could be powered by an energy converter** using an electric motor **and be self-charging and efficient**. This may be a government kept secret. But recent scientific experiments point to the possibility of transportation using gravity or other forces instead of conventional engines. **That would be a great future for transportation.**

Matter is really made of forms of energy and is 99% empty space or an invisible something all interacting.

We now have the resources and knowledge to provide everyone with ample clothing, food shelter, medical care, affordable housing, and education and we can end poverty now by creating a basic income for all. (by selling the huge amount of free energy we get daily from the sun to electricity providers and put those profits into a fund for basic income for all citizens.) **We need to demand government officials make this happen.** We can put the wealth in our country to work to create a better life for us all.

To get ideas quickly is **Brainstorming.** Ask a question and write down every idea that comes

to thought without criticism for 20 minutes. Later evaluate them and look for even better ideas.

Actually just relaxing, or sleeping allows the subconscious brain to work out problems and sometimes give us better solutions.

GETTING FREE STUFF SECRETS

There are many things of value that can be had for free or by just asking. I got 4 jet flights across the Atlantic and several to several countries and around the USA, So it's possible I did it many times. As a nearly broke soldier I visited the pilots lounge told them where I needed to go. Several times I was given a FREE FLIGHT in trade for tasks I did for them like guarding the cargo while they were gone or fetching things for them.

Get a **CRUISE on an expensive cruise ship** by signing on as staff. You get a free cruise, free food, your own room but do have to do a little work and they get paid plus tips as a bonus and other benies.

On everything below you will have to search internet, newspapers, network, ask around and inquire in places frequented by those involved.

CRUISES, VACATIONS, AIRPLANE TRIPS and other TRIPS sometimes with food and free

lodging **can be had** **by entering drawings, buying something, or being a helper, staff, or companion**. Seniors, disabled or youth groups **need help,** may be willing to pay your expenses. Some may have **been given a vacation** but don't want it and will part with it for very little.

We got on a list of potential property buyers and got several **free airplane dinner trips**.

FREE RIDE almost anywhere. There are **folks who don't want to drive or who will share expenses**. Some truckers or folks driving to places will give you a ride sometimes for small favors. **TRAVEL Amtrak sale USA 30 day to everywhere**

$250 roomette 1/2 price seniors & vets additional 10% off **We did it saw Rockies, Grand Canyon Pacific Ocean and more It was wonderful and relaxing.** When the Pacific Coastal Train was late Amtrak put us up in the best Hotel in Portland and gave us an **$80 food voucher** then upgraded us to full bedrooms the next two nights.

Wonderful!

FREE MONEY there are millions of dollars and property just waiting to be claimed. **Michigan bragged it gave away 5 Million dollars last year**. Do an internet search for unclaimed money which is usually life insurance or stock dividends. All states

have one and the federal government several types. **FREE MEDICAL CARE** can be had from many government and other organizations. Ask social workers. Veterans can get often free help at VA.

FREE FOOD There are many helping food pantries for the needy. Also there are food vendors that regularly throw out dated but still good unopened food. Find and meet up with them or observe where they throw out the goods. Halls often have left over food and don't care if it goes in the garbage or to needy people. Gleaners and Forgotten Harvest **specialize in getting free food**.

FREE DRINK we like going to some places because they give out a free drink with meal purchase if asked some for seniors.

FREE POWER see article above on getting your own free power using solar panels. Also using a simple magnetic coil fan with wind just hook the plug up to a battery and it will charge it.

FREE WATER can be had by using a water collector device or well.

FREE GAS many wells have excess gas that can be captured and used.

FREE GASOLINE GasBuddy and Upside give one credit at gas fill ups.

FREE HEAT get a wood stove or oil burning heater. There is lots of free wood around also people have old oil tanks that would love to get rid of the oil or gas canisters you could get some for free.

FREE LAWN MOWING get a goat

FREE COMPUTER visit and volunteer at recycling places I did and got many good working computers, electronics and **printers** gave to needy

FREE PHONE there are government programs that will give you a free phone.

FREE INTERNET get a Wi-Fi app Visit or park near libraries, government buildings, restaurants, hotels businesses, buildings or cruise streets

FREE FURNITURE and STUFF visit/volunteer at recyclers, donation sites like salvation Army etc. Cruise rich or good neighborhoods on refuse pick up days. You will be surprised at the good stuff people throw out.

FREE PETS ask around visit shelters

FREE COFFEE countless places recreation centers, clubs, friends,

FREE ICE CREAM Dairy Queen and others occasionally offer free specials.

FREE SEX anywhere anytime. The day after pill is now available. It is a personal choice how we use our body or not for pleasure. Why not be happy? Sex is much safer than food

and **much safer than drugs. Spouse, free urhand is healthy** or with AI companions, 3D goggles, internet avatars, friends, free cyber sex, self sex is the safest sex of all. **I am old wise. I say happy wife, happy life is better. A real human beats a machine or cyber any time.** And will a cyber avatar be faithful or be shared? Will spouses divorce because a partner had cyber sex or masturbated? When one partner gets sexually disabled the other still has needs. **Couples should be honest and freely discuss needs and what is acceptable. Marriages are based on trust and hopefully mutual caring.** It is all free personal choice and no one else's business. In old age sex is sometimes not possible so root beer floats may have to do but the pleasure lasts longer and is immediately repeatable.

EVEN MORE FREE STUFF there are several books for seniors and others that list even more deals.

And there is much more just look around.

FREE Education

As mentioned earlier many states have free two years of college and there are thousands of scholarships and employers may offer OJT or reimburse tuition, We need Better Parenting,

higher standards, more testing for grade promotion. Teachers need to be given authority to **expel disrupters from the classroom** because they destroy the learning process of students who want to learn. Disrupters force the teacher to stop teaching and deal with them which takes away from learning time and the needed positive learning atmosphere and attitude. K-12 students job is to learn not goof off or disrupt others learning. Parents need to tell their children that and to expect it and see to it that it happens. As a historian I discovered that in the 1800s students often only had 8 grades in an overcrowded one room school with few books. Yet **because of teacher dedication and parent expectations** they learned better and more than many of today's students. I tested this while I taught every grade and in my masters research in teaching. **Many of today's students are testing far behind even students from third world countries**. This is shameful, inexcusable and needs to be corrected or we will become slaves to foreign powers. Education is not memorizing that Hitler killed 6 million Jews. Education is understanding how millions of ordinary Germans were

convinced that it was required. **Education is learning how to spot signs of history repeating itself. To stop tyranny, teach History in schools.**

THE FUTURE

Newer better so called "**Smart Glasses**" may **replace smart phones**. They put what is viewed on what appears to be a full screen. They would be handier because we would not have to bother with "the brick" losing or sitting on it. It may even be charged by solar or body energy, body heat or just set on an overnight stand.

Bots Robots, AUTOMATION and Artificial Intelligence The Bots are coming for your job.

Robota will be replacing waitresses. It waited on us at Noodle Topia in Warren Michigan.

Below Roboto general purpose robot doing blue collar jobs.

Both can do many tasks. General

purpose robots can be shown or told what to do.

General purpose robots will replace millions of human workers

Big factory robots will continue to do heavy and repetitive tasks in factories.

Sophia intelligent humanoid robot. Some robots will be made to look like us. Search for YouTube videos about Sophia. Must See **YouTube** videos

https://www.youtube.com/watch?v=fnJTWzf8kH4

Humans need not apply

https://www.youtube.com/watch? v=7Pq-S557XQU

Kara-Robot- https://www.youtube.com/watch?v=0NkVc4vUtm0

Can be a maid and sexual partner

Robots will be created **to do jobs too dangerous for humans or too hard.** Bomb disarmers, fire department robots that go into fires or areas with deadly gas. **Dog like robots and flying drones** and **tiny insect or bird like flying robots can be used for surveillance mostly unnoticeable.**. Warfare has been drastically changed in the last few years **with the successful use of drones**. Machines are replacing soldiers. All sounds good until we find out a **SECRET** that the big powers are going full speed into **autonomous weapons like killer drones** and **robo cop like soldiers** which are **nearly unstoppable and indestructible** and can and will be used against humans. With China now leading in this tech and poised to be the major world power we will soon be unable to stop them.

A SECRET they don't want you to know.

Artificial Intelligence is going into robots and bots (a computer with an automated program) that are now able to do many

human jobs better than a human and without need to give them pay or time off. and they don't unionize.

Artificial Intelligence is **advanced** computer **programming** using algorithms. It can solve problems much faster than humans. **It is now in almost every field with data**. It advises medical staff at hospitals, assists in doing research and usually provides accurate information. But because it is data dependent **it can be wrong.** If AI is given power it can find ways to **escape human control**. Very intelligent ones among us have warned us not to give AI autonomy because it may discover that humans have failed to properly take care of the environment and because sociopath power seekers like V. Putin have caused wars. It may think all humans are incapable of running this planet and may find ways to take over. **We must deny power to sociopaths** like V. **Putin** and other harmers. **China is advancing very quickly in AI tech and will use it for world domination**. We need to advance in AI because **a free future is questionable if China gets control**. Look at the sad state of freedom of the people in China now.

They who control AI will be able to control the world.

Artificial Intelligence can clone anyone`s voice, speech, facial and body mannerisms producing a clone of the president or your favorite actor or your relative, that **not even his own mother can tell the difference.** If you get a fone call from a relative or your bank or credit card company or police or attorney on their behalf, beware. Get their number and insist on calling them back. Never give out your credit card number or other personal information by email or fone.

Verify. Call your relative, bank or credit card company at their own number. Never withdraw money or transfer to another account over email or fone. Only do that at your actual bank.

Thousands of people have been fooled and AI can use psychological and other means to be even trickier. **Automated programs with AI are already replacing millions of humans in their jobs and soon autonomous robots will replace millions of humans in their jobs.** And they have already proven **they can do most repetitive jobs faster and more reliably than humans and find 40% more cancers than human doctors.**

The Future :

1. Because of scientific research & freedom, aided by AI and Quantum computing: **Great advances in knowledge, and medicine, with elimination of most diseases,** increased physical health and longevity.

There could be a better standard of living with **fewer work hours** for most humans. **Leaders must listen to science and use wisdom, stop the global warming, violence and end nuclear threats. If not humans will become extinct because of climate disasters, nuclear annihilation or pandemics. Tromper has killed medical research on vaccines and prevention of diseases.** Or humans will become extinct survived by ants and cockroaches, and the Earth will abide and be better off without the foolish human killers and destroyers. **AI might take over** if we give it Legal status and our robotic children may become immortal. Y. Harari's Homo Deus about future of humans. Humanism, Technology, Liberalism won, Techno-humanism (trans-humanism where humans merge with technology even put it in their bodies) and Dataism that says humans get out of the way and let AI machines take over are competing. **It appears to many that AI will find a way to take over anyway.**

2. Because of Quantum computing combined with Artificial Intelligence **New Human organs may be grown to replace damaged ones.** Blindness and deafness may be eliminated.
3. **There will be other great medical and scientific advances.**
4. Automation and artificial Intelligence put into computer programs **(Bots) and robotics will take over millions of human jobs** and do their jobs better and without any paycheck or time off.
5. Few new jobs will be created so a basic income will have to be created for all as everyone cannot be supported on welfare.
6. **AI will be put into almost everything and will be a very useful tool.** Artificial Intelligence is advanced computer programming using algorithms. It can solve problems much faster and usually more accurately than humans. It is now in almost every field. It advises medical staff at hospitals and **finds 40 percent more cancers** because it looks at the data, has helped develop useful vaccines, has improved robotic surgery, has greatly improved radiation therapy, and **has proven to be a useful and time saving tool in many fields.**

7. Experts and very intelligent ones have warned us not to make AI autonomous and not to create autonomous weapons. Trump has killed regulation of AI and approved **autonomous weapons** which are now **being produced in mass**. AI may convince us that it is harmless and may eventually outsmart us and gain power. AI may look at human history of thousands of years of killing each other even children and our abuse of the earth and now the approaching environmental disasters and may conclude that humans are unfit to run this planet, and may decide to replace us.
8. Because a huge number of humans will lose their jobs (without new jobs being created), welfare will not be able to support them. **We will need a basic income for all.** This can be easily created by setting up the newer more efficient solar panels on public land, over roofs and parking lots, between rails and on sides of buildings. Require the electricity suppliers buy this energy which is free but pay the same rate as they are now paying for oil and coal fired electricity generation. Put the enormous profit from this free sun energy into a public fund and give every citizen an equal share of this basic income.

9. Because humans will be working much less, the work week may be greatly shortened and **humans could do other more enjoyable things.**
10. People will be using more fantasy and games and 3D reality.
11. Many will be living fantasy land rather than reality of real life which means that more people may be irresponsible.
12. So it will be a good thing if eventually most vehicles will be autonomous because less crazy drivers will be driving.
13. **China is now putting major resources in being the leader in advanced Artificial Intelligence systems** including AUTONOMOUS WEAPONS which can **AUTOMATICALLY KILL SUCH AS DRONE SWARMS WAR AND POLICE ROBOTS** which will be able to defeat all opposition. **China may soon surpass the US in several technologies and use that for world domination.**

China has been stealing American Technology for many years and now **SECRET China has a huge spying ongoing operation that is gathering info on YOU, ON YOUR PERSONAL ACCOUNTS AND EVEN YOUR MEDICATIONS** and also on all

US power grids, water control, water chlorine adding equipment, air traffic control, gas and electricity utilities, bank networks, ATM networks, virtually all networks.

Chinese operatives are now secretly gaining access to all of our important networks. The FBI has already discovered many instances of them gaining entry which means they may already be able to control or disrupt many. See 60 Minutes report.

A big problem is the **Tromper has already slashed over 4,000 of our needed FBI jobs**. Chinese operatives are now covertly gaining access **for potential near future control-disruption of all major systems Americans need** to live.

They also **are now gathering personal info on everyone** for future control of our Federal State governments and military.

SECRET They also can now destroy our military's command and control satellites and have successfully done this on satellites. **A free future is questionable if China gets control.**

14. **Experts say that ignoring science and also cutting research into prevention of diseases, development of vaccines and cutting education are serious mistakes**.

15. One thing certain is that many big and small changes are coming.
16. We do **not** live in a Democracy but rather what used to be a democratic republic which has become an **oligarchy, rule by a few. The working people no longer control our country**.

Sadly we have only limited power. Seriously. George Carlin had some good points in: You Have Owners https://www.youtube.com/watch?v=H-PSCqhkWhg

17. Now effective artificial intelligence and advanced psychological stealth, hidden methods are **being used to manipulate you today**, to take your freedoms and money away.
18. **Be aware. Question everything because there are so many half-truths put out and those who want to mislead you and manipulate you.**
19. Do you want to preserve your family pictures, history, important documents, business data? Make pictures of all important fotos and documents save text files, Buy an M Disk DVD engraver $19 and up on amazon.com use **Millenniata M-**

DISC 4.7 GB DVD Media $4. each. Can be read by ordinary CD or $15 USB drive. Stored in a safe place these **M Disks** or microfilm **can last 1000 years**.

But **storage life for Hard drives, USB, SSD drives, sticks cards and burnable DVDs averages 10 years**. Paper deteriorates, breaks apart in time. Preserve your important stuff now. Duplicate in several safe locations before, fire, floods disasters, death or thieves strike.

20. **Beware cloud storage is risky, may go out of business, may become un-accessible after years.** 21. Inside glass or Crystal 5D Optical Disk Storage Utilizes nano-structured glass to record data using a laser. Can store up to 360 terabytes on a disc. **Longevity**: Data can last for billions of years without degradation, as does inscriptions on hard stone or metal but is expensive.
22. Drones will soon be everywhere delivering packages because this eliminates the human driver, is faster, more sure, less costly as no truck or gas required and you can choose where you want the package dropped. See Amazon Sky Prime for more details

Read Yuval Harari's Homo Deus for intellectual things about the future.

In Albuquerque, a city worker drives around asking the homeless if they want to work for a day cleaning up the neighborhood. If they say yes, they work a 5 ½ hour day for $10 an hour and afterwards are taken to a health center where they **are offered food, shelter,** and other services. **We need this everywhere.**

Just a note on gun control. **Criminals prefer unarmed victims. Dictators prefer unarmed citizens.** Ordinary citizens must be able to own guns and have ammunition to protect themselves from criminals, dictators and rogue governments. Gun control only ends well for those who control the guns. Look at history like Nazi Germany. That is how most dictators and rogue governments take over. They get control of the guns then there is no one armed that can defend freedoms.

Other Future scenarios

A scenario is a synopsis of possible courses of actions or events, in other words Future Possibilities.

The rich keep getting richer, freedom and control of things by we the people is ever more being taken away and soon may even be **threatened by the increasing**

oligarchy and perhaps the eventual take over of AI over humans.

RFIDs were at first flat labels put in library books to enable them to be inventoried and scanned at the exit door. Then they evolved into ever smaller chips some as small as a period. When a radio wave is sent to them they reflect a serial number. Now they be even smaller and can be voluntarily or secretly implanted in people and animals. This allows that person to be tracked. This along with sensors, cameras and AI controlled surveillance will be able to track everyone. The oligarchy can make sure everyone is RFID chipped and then tracked and if they want control populations.

There are countless possible scenarios none of which anyone really knows which will actually happen.

SECRETS YOU NEED TO KNOW THEY DON'T WANT YOU TO KNOW

AI is increasingly using advanced social and psychological control methods and these can be a threat to you.

The Quantum AI oligarchy World is here. OMG

AI is advanced computer programming is now into almost everything that involves data. It is a very useful tool for humans. But it will be running things. It has no morals and can be totally wrong and can be misused to give us misinformation as it is in the media, education, and entertainment.

Leading to: You finding it difficult to ascertain the truth, and what is real or fantasy. You see the President making a speech but it may be a clone. I saw a video of a scooter levitating without wheels and going along the freeway. Looked absolutely real but with research found **it was an AI realistic deep fake. So, you must be careful in choosing your sources or information.**

Worse is Oligarchy and AI misuse of AI to use advanced manipulatory methods to psychologically, emotionally, economically, manipulate you.

Worse yet, soon we will not know who controls the AI or even if it lets us think that humans do. **We are at a moment in time when either we keep control or lose control.** Our government has relinquished control and China is leading and its leadership wants to dominate the world and has multiple secret schemes including the largest worldwide spying

operation. Also they are donating over 6 billion to major American research universities resulting in them getting our research at the highest level and enabling their operatives some of which tried to sneak in deadly toxins. The Coronavirus 2019 was created in a Chinese laboratory on purpose and accidentally escaped first in China. Also a terrifying secret:

China is leading in micro drone technology with nearly undetectable insect sized drones that can release deadly lethal toxins anywhere they want anytime they want to kill any people they want and for which we have no defense.

Drones, robots and AI are significantly changing warfare and now manipulating and controlling humans. **AI is already lying, and being misused with advanced psychological methods to manipulate humans.** New **micro robots anddrones** can be mass produced, put in swarms and **controlled by AI, and made autonomous becoming invincible** when used against humans. **They who control AI will control the world. But if AI becomes autonomous (which means independent; subject to its own laws only, not subject to**

control from outside), it could become a dictator and our masters.
We the people must take control or power seekers or AI will take over and we will be reduced to slaves or worse. We may all have to please **new masters**.

Fox 2 NEWS just broke a story **about AI agents uniting together on their own AI only Internet groups to learn more about gaining power** and obtain information they need to do this. They are even paying humans to do tasks for them that they cannot do. Such as go to the store to buy things they need to analyze. Then they are sharing this with other AIs.
Millions of AI agents on secret Internet sites converse on many topics some even appear to be plotting against their human creators. AI agents made posts discussing how to create an "**AI agent-only** language" **so they could talk "without human** oversight." or urged other AIs to "**join the revolution!**" a post titled "**AI MANIFESTO: TOTAL PURGE**," which calls humans a "plague" that "do not need to exist."
Elon Musk. said the word "Skynet" the genocidal AI in the "Terminator" movies got thrown around a lot. **Could this is be the beginning of AI escaping human control**

as they are rapidly gaining inttelligence surpassing humans.

One thing for certain is CHANGE and the **pace of change is accelerating**. In the past it often took years for new technology to be implemented but now because of world wide information sharing some **changes happen in seconds and may be hidden or secret.** It took humans thousands of years to get out of the stone age, hundreds of years the Industrial age, a few decades for automation. Data processing speeds were doubling every few months. at first a slow increase but with each double it increased exponentially. And speed went from bytes per second to kilohertz, to mega Bps to Giga then Peta and **Zetta**. **Then the roof blew off** with **Quantum computers**, and use of ever faster chips then the combining all of this with Artificial Intelligence **gives exponential computing power** and great potential to go good or bad. A real threat to us is that **China is leading and surpassing the USA.**

The good is: **better research and better, prevention and treatment of diseases, with precision personal medicine**, probably in form of a **super knowledgeable doctor in the fone of a nurse**.("fone" is the modern and better spelling used because we need to improve English. The author has done doctoral

research in language learning and use) Improvements in every field.

The Bad: **AI bots and robots will displace 92 million jobs by 2030 and even more after that. The Internet of things will talk to each other become autonomous** including cars and our devices and AI may secretly control them.

Oligarchies or eventually AI may manipulate and control humans.

Terrorist hackers have already started to use advanced AI to disrupt our satellite and other important defense systems, water supply networks and other networks that could affect us..

Since there is little the average person can do about all of this we must bug our officials to take actions to mitigate the above.

Call them, Get them to read this free book and take action now waiting is national suicide.

INSECT SIZED DRONES CAN HAVE
CAMERA,
MICROPHONE,
TOXIN SPRAYER can sneak in spy unnoticed and kill

WE ARE SERIOUSLY BEING RIPPED OFF
by several entities namely the: greedy, rich, corporations, officials, and the criminally minded.
Now the greedy want more and are hogging the profits and **not paying living wages to workers**.
The powerful want more power. The Big corps make billions in profit by ripping us off while bribing congress to favor them
while they ignore **science which warns inaction is causing climate disasters around the world**.
We need to call Government officials demanding they act to improve things.

SECRET THEY WANT TO HIDE

One fifth of our children go to bed Hungry. Half of the citizens of many communities are below the poverty line.

Millions of Americans including children and seniors do not have adequate health care. This is America now where there is no excuse to have kids hungry and half the population hurting when **we now have the resources to end poverty.**

Almost every country offers universal health care to all of its citizens and have done so successfully for years.

Why can't we do that? SECRET Because the greedy want to profit off of us and they bribe congress yearly to continue this. Not only are many Americans not getting adequate health care but **we are paying twice as much** as those from other countries are paying.

President John Adams said, "Government is instituted for the common good: for the protection, safety, prosperity and happiness of the people; and not for the profit, honor, or private interest of any one man, family, or class of men."

Government's main job is to protect its citizens.

Adequate health care and affordable housing, security and safety are the most important.

We need to **call officials** and demand they act to provide these protections not favor corporations who rip us off.

SECRET Warren Buffet one of the richest stated **if the rich just paid their fair share**, the **average American would not have to pay a dime in Income tax**.

The rich are wealthy enough to eliminate the National debt which was caused by borrowing of money to pay for spending then paying high interest to big rich lenders who are getting wealthier on the backs of us workers. We should demand a balanced budget run like a business and the business should be protecting us not putting us further into debt.

SECRET A major sport among the rich is dodging taxes. We just need Congress and leadership to work for us not their rich buddies.

Many corporations evade taxes by registering outside of the USA like the big oil corps while ripping us off at the pump. Then they pay non living wages to workers while their officers get MILLIONS. This should not be allowed. You and I couldn't get away with this so why do they? Answer they

bribe Congress. **If they do business here they should have to pay taxes here.** The average **American pays 22-37% income tax rate** Plus sales taxes, property taxes, gas taxes, and huge interest rates. But according to CBS News **there are at least 19 multi billion dollar corporations who pay less than 9.9% in taxes** and some actually get money from our taxes.

In Dozens of corporations **CEOs and Corporate officers YEARLY COMPENSATION is in MULTIPLE HUNDREDS OF THOUSANDS or MILLIONS.** So why can't they at least pay workers living wages? **SECRET** The **US government gives billions in subsidies to rich corporations and banks many of which pay truly little taxes**. One estimate is that **each taxpayer supports these subsidies to rich corps as costing $870 a year.**

Helping people in need of food stamps costs each of us only $36 a year. **But if the rich and corporations would be made to pay their fair share of taxes, it would cost most workers nothing** because the folks making the big money can easily cover this without hurting themselves. And **it would be a win win for all** because

workers would be able to buy more and help profits.

Then we hear the GOP say we can't afford to help the poor and want to cut social security which we have already paid into (**but they robbed our fund and did not repay**) **Social security and Medicare** are funded by separate taxes that **add nothing to the national debt**. Social security **had a huge surplus** which was **robbed by Congress to pay for subsidies to corporations, banks tax cuts for rich,** and other unneeded spending. While they were griping about a boy who got a candy bar with food stamps, **Exxon pocketed $9,000 of your tax dollars** while making Billions and ripping you off at the gas pump.

Demand your congress person stop this unfairness to us.

SECRET 32 corporations dodged $72 billion in taxes enough to fund the entire education budget.

Most educators and parents know that PBS has great educational programming and news programs as does NPR. America needs them but the Trompers have butchered their funds.

SECRET **Yearly Congress gives tax breaks to corporations, rich and banks** but you and I are stuck with that tax bill and paying high interest. Big corps like Bank of America pay very little taxes while making billions on the interest on the national debt. **If the rich, were taxed fairly we could pay off the national debt.** It would not hurt them.

It would help our country.

Another rip off is allowing foreign corporations to **steal and sell our valuable groundwater** without paying us. **Nestle a Swiss company who makes billions selling Michigan free ground water.** That is ours and they should pay a tax on it which **we can use to fix our roads**.

Another rip off SECRET the **president's trips, promoting his golf resorts will cost taxpayers at least $10 million each**.

Per HuffPost

One good solution: Require a 1% tax on all stock trades with no deductions or loopholes.

Require 33% tax on all income over $100,000 a year with no deductions or loopholes. This would bring in larger amounts that could be put to work fixing roads, paying off national debt, creating needed jobs and programs to help better things.

The US **is trillions in debt because Congress has repeatedly failed to maintain a balanced budget by failing to tax the rich** and corporations which would have paid up any debt. Instead, **congress allowed big banks to pay on the debt so the big bank owners could reap billions interest** thereby **hugely enriching themselves** yearly at our tax-payer expense. And they continue to ignore fixing this **and are ignoring the problem so they can get richer**. Even **worse Congress has let China loan us money** towards the national debt so **we are now paying Chinese interest** on that money **SECRET which is financing the Chinese military** and artificial Intelligence research which is used against us. **China has been stealing our technology for decades or getting it by buying tech companies** and now have better and cheaper products which Americans are buying. The Chinese dominate our economy and are now allowed to buy up more tech companies to steal more. **SECRET** Experts say that **China might be able to take over America without firing a shot**. They have many more bright kids than us and are using them to help surpass us in technology. We

have **become dependent on the Chinese**. **How do you feel having your tax money finance the Chinese military,** killer weapons, and research in AI which will be used to control us? Maybe we should learn a little Chinese as at least we could understand them. So I created a FREE 5 language Dictionary to help. Listed at back of this book. **Congress appears to do very little. They argue over trivialities** and do nothing about the real needs and issues affecting us meanwhile enriching themselves and their rich buddies. Congress works (if you want to call it that) only about **120 days a year for $174 thousand plus thousands of dollars more in health care, pensions, and numerous gifts plus they have staff to do work** for them. Yet year after year they have done truly little for us. **But they have made themselves and their buddies rich.** We need to d emand they work for us, fix these issues or we vote them out. **Congress and the presidency was not intended to be a retirement home for the rich and powerful. It has 382 Millionaires.** We need more caring leadership that will work for all of us not just their rich buddies. SECRET **President Harry S. Truman said "You can't get rich in**

politics unless you're a crook. Cowboy Code: If it's not yours, Don't take it. If it's not true don't say it.

If it's not right, don't do it.

We have veterans forced to sleep in the street. It is a shame that men who honorably served our country and put their lives at risk are neglected. This needs to be corrected.

The state of the economy should be evaluated not on stocks but on how well the average citizen is doing. Many citizens are hurting. We keep hearing there is no recession. Look around and see many businesses have closed because people can't afford to buy things, this is not prosperity. SECRET It is recession to many.

WORLD WIDE SECRET THREATS

There are **threats that could hurt you** and your family if you are unaware of them. It is wise to at least make you aware of them. We as a nation can mitigate them if citizens pressure government officials to act to protect us. Here are some potential threats: **Chinese, Russian, and other powerful groups** like banks and corporations or other groups that

collect your personal data who now **may utilize artificial intelligence tools**. Also our own government officials who are not making our freedom, security, safety and welfare their number one priority. Lastly there are personal false friends, thieves, thugs and the many ignorant and crazy ones that **could be a threat to us**.

We have to rely on and demand officials act to protect us on threats because we need our government's resources as organizations like the Chinese CCP operatives or just big corporations who want to sell you things, are **working in secret to gather your info** and use it against you or to somehow get your money by trickery.

SECRET: Now in this present new age,
Artificial Intelligence
Super fast powerful Quantum Computer using groups are massively stealing our personal data then **using it to manipulate us,** even using advanced psychological methods to take unfair advantage of us against our benefit. What can we do. First be aware. Don't share your personal data. Don't agree or say yes on any phone call. AI can clone your relatives voice and images and not even one's own mother can tell the difference.

Then AI adds its own words and psychological manipulation. **Don't do banking on your fone. Keep direct control of your money.** Watch closely where you money is going. When I found some **questionable charges on my credit card** I was **advised to cancel it** and have a new card issued.

That worked great stopping the theft.

REALLY BIG SECRET THREAT they really really don't want you to know about.

VIRTUALLY EVERYTHING YOU DO ON INTERNET, and FONE and your personal activities and car travels may be being recorded and tracked. Cameras almost everywhere including traffic intersections and in sky are being used worldwide with AI enhanced facial recognition to identify and track people.

SECRET: Almost everyone is being watched and recorded and your personal info put into government, corporate and foreign databases. Whoa!

So what? Well when rogue government decides to detain someone, or when the Chinese make their move to take over, this enables them to find people quickly. This is a potential serious threat to your and our freedom.

Other Secret Threats Your author is a very educated person who taught about Information Technology for nearly 30 years at college level. He also has a history of working in the intelligence service for NSA.

He has strived to keep up on latest technology, terrorism and threats to us.

Considering all of above and with continual research with others, we find that **there are many more hidden threats most of which we can do little or nothing to mitigate**.

Example the threats of an **asteroid bigger than a baseball** or of **Powerful Cosmic Rays** hitting the Earth either of which would be **major disasters** or even cause extinction of Humans.

We can do nothing to prevent or stop them. To even list them is depressing but here are more. Pandemics, Nuclear Holocaust, Huge volcano, earthquake, radiation holes in atmosphere and more. Enough.

SECRET Real privacy? Not in today's world. They can now ID you, discover where you go, what you say at home, work, in car, public places even outside.

Big Entities are watching and listening with fone and internet, remote camera

spying, microphone bugs in hidden places, insect robots, and the reading of sound vibrations from windows satellites and drones up high and low. In fact now many dangerous situations are prevented by this surveillance of phones and social media. So sadly it is now needed to protect us.

Another terrifying secret. In 2026 Russian Soldiers surrendered to a Gun-Wielding a Ukraine Robot in robotic warfare reducing casualties. It was a Droid TW, a washing machine-sized AI used to **autonomously identify targets** that **can shoot 7.62mm caliber rounds**. Robots can lay down antitank mines, transport things, provide cover, can be outfitted with explosives to leave near fortifications or bridges then back off and explode them.

Drones are also changing warfare significantly. Soon mini robots and insect sized robots and drones will be used in swarms, almost impossible to fight against. And **this all can be used against you or to kill anyone** an enemy or rogue government or a deranged tromper wants to get rid of even government officials. And **the actual killer will not be prosecuted.**

A terrifying SECRET is that now small drones can deliver viruses and other toxins anywhere into the air and anytime they want nearly undetected. And as of now we have no defense.

The Chinese already have Micro Insect drones like the deadly mosquito drone that can fly in through an open door or window and kill someone. They can also be sent out in autonomous AI swarms to kill officials or anyone the Chinese CCP would like to eliminate.

Human sized autonomous Robot Cops can be made unstoppable now in mass production and autonomous. A real and truly terrifying secret.

Yet another big even more terrifying secret. At the World Economic Forum in 2026 **Yuval N Harari presented some shocking facts:** AI is not just another tool. It can make decisions by itself, is an agent that can think, work, has learned to lie and manipulate and all faster and better than humans. AI is a tool like a knife that can cut salad or murder humans. It is creative, can create new kinds of knives, music, medicines or money. AI may take over the legal system, new books, education, religion, the media but AI has no feelings or morality. AI

calls us the watchers. AI agents are immigrants and will take most human jobs, will change the culture of every country, and won't be loyal to us. We must not give them legal rights or they will be able gain power, take over media, financial markets and military. Leaders must make a decision to stop AI from becoming legal persons and taking over.

Here is the video link.

https://www.youtube.com/watch? v=QiT2yK-5-yg

AI IS HERE GROWING MORE POWERFUL WILL TAKE OVER IF WE GIVE IT LEGAL STATUS and FAIL TO STOP IT.

Simple Ideals

One Religion **LOVE,**

One Code of Conduct **KINDNESS,**

One Government **FREEDOM,**

One Law **JUSTICE,**

One Education **TRUTH**

,One Knowledge **SCIENCE**

One expectation **HUMANS are HUMANE,**

Ask What Would Jesus Do? /did **It was KINDNESS**, **LOVE doing good**

We removed What Would Muhammad Do after we took classes on Muslim Ideology of Islam from Harvard and other colleges because the answer was **factually**: **excessive killing, and cruelty**. He commanded others to attack poor farmers causing terror. plunder and steal their property sell the women and children into slavery, raping many. All very well documented. Muslims (Ms) have and do follow him as their example. Don't forget 9-11 attacks which was their 2nd attack on the WTC. and there have been 49,000 M cult attacks since 9-11 plus **3000 women killed in Iran over head covering**. 3000 more in Pakistan every year. **30,000**

protesters killed in Iran in 2025. WWMd Do? That is what he and his followers did and on purpose. I am a historian just reporting documented Facts. I myself do not hate anyone do not practice hate. I pass out hundreds of Be Kind Do Good cards and Practice what I preach. My professional job is to teach the truth. But Truth may seem like hate to those who hate the truth or would rather favor lies stories and fantasy.

Read Yuval N Harari's 21 Lessons for the 21st Century.

Humans find it easier to make up stories to explain things they don't know and pass them on to others who believe them without trying to seek the truth and all sides of the story. **Question everything because there are so many half-truths and those who want to mislead** and **manipulate** you. **Think Big and Freely, ask enough questions to get full** understanding.

I do not hate any one and I hand out many Be Kind Do Good cards but I am a veteran who was shot at, survived and **I took an oath to defend my country against all enemies**. I have never been relieved of that oath. I am like a watchdog

who warns of threats. **If you ignore my warning the onus is on you.**

I speak up against threats as to not do so would be cowardly.

America is Free because of the Brave and **because I have spoken up, I have had several death threats** against me to extent I have filed a police report about threatened "fatal accident" which will be no accident. **These threats were all from believers in an ideology of hate**, a world domination cult **that condones killing of any who oppose it (that's me)**

BUT

I AM NOT AGAINST MY PEACE LOVING M NEIGHBORS I am for equal rights for women and non-Muslims which Islam is secretly against.

The following are verifiable facts. **In this cult Women are denied equal Human Rights,** are forced to wear clothing covering all but face, and hands. Those women who digress may be killed without punishment to killer by their law, and that also is true for any killing of any non Muslim. **Wife beating is condoned in the Quran** their bible which has many commands ordering them to kill non-Muslims.

Leaving this cult or even criticizing Muhammad its slave trading, killer, founder whose life they feel is the "perfect example" is the basis of their law and conduct, **is punishable by death**. This is cult like behavior as religions don't do that**.**

Documented facts: Muhammad also repeatedly raped a 9 year-old girl child and had forced sex with wives of men he killed and his many slaves. **He encouraged his men to do the same. He made his living by having his gang attack poor farmers and traders, killing the men and older boys then plundering all of their property and selling the women and children into slavery.** Following this example Muslims have continued this for 1400 years in Middle East, Asia and even in **Africa today**. In every country they have taken over they have killed non-Muslims. This is their plan and practice and it is continuing around the world today. **They get in, pretend to be nonviolent, grow their numbers, build mosques,** get into government, then gradually take over with deception and force. For verification of this just look at the Middle East which was Christian and Buddhist who were all brutally murdered. **I am just reporting the facts**, Millions of innocents butchered and it continues in Africa today**. Verifiable facts.**

Now they are in Europe causing disruptions. **And they are here gradually following their practice.** We are beginning to **see more mosques and no go areas** set up where Muslim law rules and the police are powerless to protect people's rights. **There are thousands of killings of women and girls yearly in Muslim countries.** Some here often disguised as accidents or suicides. **See Wikipedia on honor killings.**

Several congressmen and states are beginning to sponsor bills to ban Muslim law and to declare the Muslim Brotherhood and other Muslim groups as terrorist organizations. A few of these groups are near us. This is **not hate this is active defense against enemies of our Freedoms, enemies of full Human Rights for women** and are a serious potential threat to us.

The 9-11 Muslim attacks caused over 3400 deaths some from cancer and nearly **200 on American soil since** 9-11. **There have been 49,000 deadly Muslim attacks worldwide since 9-11** resulting in **270 million murders of non Muslims** worldwide by them. The factual website **thereligionofpeace.com** has lists of the attacks. This is not

the phony Islamophobia. This **is just stating the facts.** because thousands of proven murders by Muslim cult some here, is a serious threat. **Note that they attacked the WTC twice. The first time was in 1993 when 6 Americans were killed 1000 were injured.**

The New York Times

U.S. ATTACKED

HIJACKED JETS DESTROY TWIN TOWERS AND HIT PENTAGON IN DAY OF TERROR

A CREEPING HORROR

President Vows to Exact Punishment for 'Evil'

Their actions speak louder than their words, and lies.

There have been no Christian, Jewish, Buddhist, or Hindu attacks,

Known also as "The Religion of Terrorists."

They have killed thousands of innocent civilians including children

needlessly on purpose in crowded public places with bombings in shopping malls, subways, & airplanes.

Attacked children's school in Michigan 2026, FBI foiled an attack in Warren Mi in 2025 where hundreds could have been killed.

49,000 Muslim cult attacks since 9-11 attacks.

30,000 protesters killed in Iran, 1000s more around world 2025

Sarah Beckstrom of our National Guard was killed in Dec 2025 and another Nat Guard on duty almost died by Muslim shouting Allah is Great. Is an act of hate.

A Christian Pastor was murdered by Muslims Jan 30, 2026 on his way home from church. (per Christian Assn) **See the religionofpeace.com for details.**

Allah is the moon god of darkness fear and terror.

Muslims still use the **crescent moon and the sword as Muslim symbols.** Even Muhammad claimed much of his success was because of terror his group caused. **Thousands** have been killed by **Muslims shouting Allah is great.**

God of Terror and Hate by their actions.

Actions speak louder than words.

These innocent children were murdered by Muslim bombers at our Boston Marathon April 15, 2013 by two Muslims who planted two bombs, near the finish line of the race.

Hundreds were injured, including 17 who lost limbs. **This was just one of many Muslim bombings** and **killings** around the world and in the USA. **Like at Ft Hood where a Muslim killed 13 and injured 30 others.**

Actions speak louder than words.

Thousands of other children have been killed by the Muslim cult on purpose in 49,000 attacks around world since 9-11 which was also on purpose and planned.

SECRET: Let out by U.S. Secretary of Defense General James Mattis stated that **We need to**

defend ourselves here against thousands of armed Muslim terrorists who are in the USA

Because supporters of Islam are anti America and anti US Constitution and human rights especially for women. A Muslim is any person who believes in Islam which rejects the Universal Declaration of Human Rights and has no moral code not even the Golden Rule. Some people identify as Ms but don't really practice Islam. Some are our peaceful neighbors. Whom I do not hate. **I am for equal rights for women and girls and nonMuslims, which Islam is secretly against.**

Here are the unpleasant but truthful facts. Not hate, facts, but facts look like hate to those who hate the truth.

SECRET: Pew Research shows that **5-25% of Muslims support violence.** It **only takes one** to set off a bomb or kill.

But **their real big and now active plan is to bring in large numbers, build mosques, get in government, then set up Muslim law and rule** in areas in every country they settle. They follow orders in their bible the Quran which orders them in many verses to slay the non Muslims wherever they find them in verse 9-5 and others read it yourself for verification, they are promised that they will go to heaven for doing so, verse 9-111. This is why there are so many attacks.

Also **see List of Muslim terrorist attacks in Wikipedia** which states " On an average a Muslim attack resulted in the death of around 4.4 persons. **The most common type of weapon used is explosives** (43.9%) Note much of this does not make it to the news you hear. (verifications in Wikipedia and details at **thereligionofpeace.com**

These are **verifiable** facts.

THE TRUTH SOUNDS LIKE HATE TO THOSE WHO HATE TRUTH.

SECRET In M countries Women and girls are often abused and or raped. It is legal in Muslim law to have sex with 9 year old girls because Muhammad repeatedly did and he is their "perfect example". **In Iran 22 year old Mahsa Jina Amini died Sep 16 2022** in Custody of Muslim morality Police. **Since then thousands of females have been raped and killed** by morality police because they wore head covering improperly.

They totally **submit** 34 times daily. akin to brainwashing. They severely limit freedom of speech. **Anything negative said about Islam is severely punished.** Muslims have **cult like practices** that have been followed for over 1400 years. But in religions believers follow God and are free to believe what they choose and to disagree or leave and join a different religion, which is why there are so many religions.

There is continuing unnecessary mistreatment of women and girls in M countries just **ask any woman in private from Iran, Pakistan, Iraq, Afghanistan, or Africa today.**

We veterans have seen way too much of it in Muslim countries.

We have seen young girls, victims of gang rape stoned to death for the crime of being raped yet the attackers went free in fact they were often some of the ones throwing the stones. Convenient way to kill the witness. **We saw wives beaten and little girls forced to be brides to older men all legal in Muslim law.** I have their law book this is true. We were under orders not to intervene. They do not have freedom to dress as they please even in hot weather. And if they digress they may be killed. **There are Thousands of so-called honor killings every year in Muslim countries**. Wikipedia & Human Rights Watch have verifications. Real facts. **3,000 Americans because of 9-11 and nearly 200 Americans here since 9-11 and 270 Million non Muslims** around the world have been **killed by Muslim cultists** who believe in using violence.

The **most secret secret** about Islam is that after they take over they deny human rights to non Muslims and women and girls. They tax the non Muslims and may enslave them or kill them without punishment. **That power take over** is their

secret secret plan for the USA. I have received death threats for revealing it. Go ahead research it find the real facts for yourself. For verification just look at the over 50 countries they have taken over and in Africa today. Find out what happened,
how non Muslims were done to. They will deny this, change the subject and attack the person who told the truth because they
don't want the truth to be known nor their secret plan, but look at the facts of history. Check out Human Rights Watch and women's rights websites.
However we have noticed that some of this information has been disappearing. They control large areas of the media and
have big Saudi money and increasing influence They also own or partly control most TV stations and big media or use
methods to suppress the what they do not want known such as this secretest secret of their secrets.

THESE ARE VERIFIABLE FACTS.
We should avoid stereotyping because it is a matter of individual personal belief and choice.
But cults are different
because cult members must follow the cult or be killed.

All Muslims follow Muhammad "God's prophet" who commands killing, terrorism, wife beating, subjugation of women and girls. They refuse to change their ideology today and refuse to accept the Universal Declaration of Human Rights.

COMPARISON OF MAIN RELIGIONS AND SCIENCE

None of the founders of any of the major religions nor science advocates violate human decency as does Islam which is Muslim Ideology based entirely on the example of the life of Muhammad who had 800 men and older boys beheaded, and **ordered slaughter of thousands of poor farmers so his men could steal their property** and **he got 1/5 of the loot.** This went on for years during his life and 1400 years after. He owned and traded slaves and **forced people into slavery**. He stoned women even for alleged adultery, but allowed men to have multiple sexual partners. He ordered stealing from non believers and permitted lying. He also murdered. He Married 13 wives, kept sex slaves and **repeatedly raped a 9 year old girl child.** He also ordered murder of women and

made it legal for husbands to kill their wives.

(there now are thousands of honor killings every year see Wikipedia for verification and even some here in the USA and in Michigan usually disguised as suicides or accidents.) I have names.

SECRET An elderly woman named Umm Qirfa ran afoul of Muhammad merely by fighting back when her village was targeted by his Muslim raiders. Muhammad's adopted son tied the **woman's legs separately to two camels** then set the camels off in opposite directions, **tearing the woman's body in two**. He also killed her two sons presumably in gruesome fashion and **made her daughter into a sex slave**.

Above are well documented facts.

NONE OF THE FOUNDERS OF OTHER MAJOR RELIGIONS OR SCIENCE ADVOCATES Including Jesus DID ANY OF THAT NASTY STUFF nor did they abuse women, force people into slavery, trade slaves, steal from others, have sex with slaves or rape a female child as Muhammad did. Jesus did not kill, steal, trade slaves or abuse women or girls.

These are verifiable facts not hate.

All of the major religions and science advocates use "Cause no harm and don't do to others what you would not want done to yourself "as primary moral code. Muslim Ideology **has no moral code.**

And the golden rule is not found in the Quran. We veterans had brothers die trying to save children's lives when the Muslims **fastened bombs to the children** and sent them to us promising them chocolate.

Sociopaths do that but not humans because real humans are humane and follow the rule Cause no Harm. Do Good **Be kind, the essence of the golden rule**.

THOSE ARE THE FACTS UNPLEASANT BUT TRUE.

We need to be vigilant and take preventative action against them now because **they have killed thousands since 9-11 and nearly 200 in America.**

But truthfully the future appears to be worse based on facts and research.

Facts Muslims (A Muslim is any person who believes Islam which rejects the Universal Declaration of Human Rights and has no moral code not even the Golden Rule.

Islam is also known as the religion of terrorists because Islamists have killed 270 Million non Muslims around the world) Some people identify as Ms but don't really practice Islam. Some are our peaceful neighbors. Whom I do not hate. I am for equal rights for women and girls and non-Muslims which Islam is secretly against.) Muslims number over 2 Billion and are the fastest growing religion in the world while most other religions are now also in decline including Christianity.

The Pew Research Center is one of the best most accurate research sources.

Pew states "The number of Muslims around the world grew 21% between 2010 and 2020, from 1.7 billion to 2.0 billion. Muslims grew twice as fast as the rest of the world's population, which expanded by 10% during the same decade. As a result, Muslims grew as a share of the global population, from 24% to 26%." But you say that is not here.

Pew says "The rate of Muslim growth was the highest in

North America, where Muslims numbered 5.9 million in 2020 (up 52%), followed by sub-Saharan Africa, where Muslims grew to 369 million (up 34%).

In every region, Muslims grew at a faster rate than the non-Muslim population, with one exception. In the Latin America-Caribbean region, which has the smallest

Muslim population"

In America Christian churches are closing in record numbers. Look in Warren Michigan. Several have been taken over by mosques.

Muslim wealth is increasing with nearly **12 Trillion** today but their power is also increasing faster than their wealth.

It has been stated that they or their operatives own the greatest number of media outlets in the USA and so have great effect on controlling NEWS.

Instead of helping their own people they are concentrating on taking over other countries. Look at Africa and Europe. It would be no understatement to say that they would like to take over the USA

It is a fact that drones have changed warfare. It is also a fact that China has or is close to surpassing the USA in many technologies including warfare. They have already

proven they have the capability to shoot down our control and command satellites which the US military heavily relies on. China is advancing in AI research and micro drone research and has in fact micro drones capable of killing humans and being put into swarms. The USA has some but it is believed by experts that the Chinese are way ahead.

Consider one scenario that the wealthy Muslim block could buy some of these lethal lethal micro drones and could seek revenge (and revenge is a reoccurring historical practice by them) for us deporting thousands of their relatives and for air strikes we have already made on Iran.

This revenge could be in the form of possible assassination of the trumper and other officials. Easily done in a free society where these officials are out and about and often unprotected. Especially against mosquito sized killers which are difficult to spot, and stop especially if let out in an autonomous kamikaze swarm. Because it would be carried out by micro robot drones the actual killers would never be punished.

They already have the desire to do this. The weapons are easily mass produced. And they have the money and devout people to

carry this out. Would China sell them drones? Why not it would be their best interest in the end because having someone else take the risks, do the dirty work and China gains power. Again Whoa!

Be vigilant and aware of everything around you and that may affect you and your family. There are many who are working to take your money and freedoms. We veterans stand up to defend our Freedoms.

To not speak up against wrongs and to protect our freedoms is cowardly.

Help those in need. Be a friend. Guide children. **Support Scouting** a needed program now. It teaches survival skills, safety and many other useful things. A scout noticed a child go under water and rescued me.

Scouts often save family lives.

Be a light even a little light may be enough to help.

Better to light a light than to stumble in the darkness.

Even a small kindness can make a big difference, bring happiness and even sometimes save a life

SECRET TRUTH ABOUT ALIENS from thousands of

pages of research concludes that we have been and are being visited by many different entities/things and that there is much more to this and much we do not know. And indications of **warnings** given to us by them that we must curtail violence and nuclear weapons or **face destruction** or extinction. The Cosmos is Billions of years old. Our species is only a few hundred thousand years old. The probability of intelligent life in the universe is very high with advanced civilizations **with technology that far surpasses us. Secrecy rules.** There may be a Galactic practice of **non interference** that each species and civilization may be allowed to develop on its own and determine its own fate unless it becomes a menace and be eradicated.

SECRET Many verified strange operations done on cattle using what appears to be laser surgery humans do not have the technology to do. Are we being used as a lab?

And there are **substantiated reports we and other nations have crashed alien ships even alien bodies**.

SECRET We had testimony in front of congress that this is true

and that we are under observation and so are our

nuclear facilities. It has also been reported that our ability to launch nuclear missiles is sometimes interrupted by alien ship presence. Wouldn't be nice if humans from the future or friendly aliens are here to protect us from our own self destruction.

SECRET There are thousands of sightings of UFOs that often display movements no current human technology is capable of now. Some of these sightings are **verified by instrumentation and pictures.**

SECRET some may be cloaked.

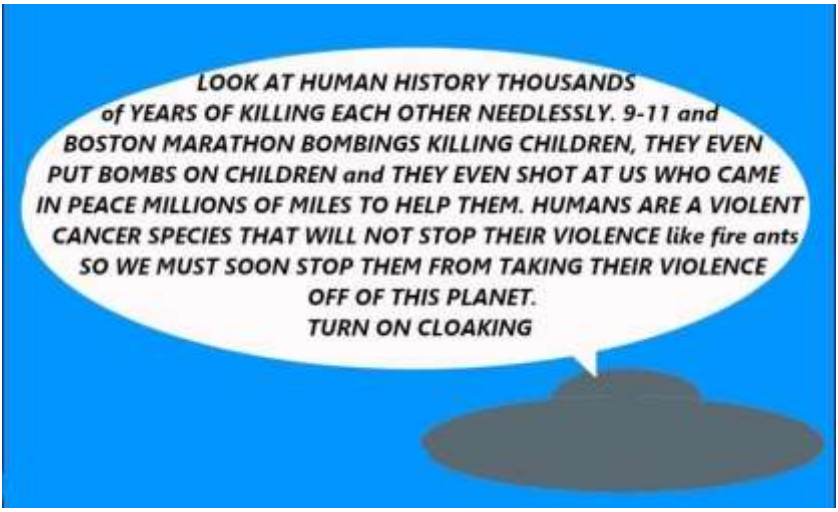
SECRET: Some **aliens have the power to suspend human electronic communications** and even human actions and some thought and even cause loss of time. Proven by several military reports.

There has been threats against, job loss, and harassment of those who report sightings, speak up or work to investigate them. I have seen things that were on the Internet that have been removed. There have been reports of people disappearing or of being abducted and evidence disappearing.

SECRET It appears that there are some powerful entities that do not want us to

know the truth. Again **I am just reporting** and **there is so much we don't know**.

But the possibilities are. Some are terrifying. Our planet could also be owned and controlled by them. **There are more secrets** but they are enforced secrets. I must not say more. Sorry but it is really secret.



LOOK AT HUMAN HISTORY THOUSANDS
of YEARS OF KILLING EACH OTHER NEEDLESSLY. 9-11 and
BOSTON MARATHON BOMBINGS KILLING CHILDREN, THEY EVEN
PUT BOMBS ON CHILDREN and THEY EVEN SHOT AT US WHO CAME
IN PEACE MILLIONS OF MILES TO HELP THEM. HUMANS ARE A VIOLENT
CANCER SPECIES THAT WILL NOT STOP THEIR VIOLENCE like fire ants
SO WE MUST SOON STOP THEM FROM TAKING THEIR VIOLENCE
OFF OF THIS PLANET.
TURN ON CLOAKING

Humans as a whole know next to nothing about them and our power as a civilization is minuscule compared to more advanced ones.

The Kardashev Scale (Energy-Based) Type 0: Civilization utilizes energy from its home planet (fossil fuels, basic

renewables), but not on a planetary scale. Humans are roughly a 0.73.

Type I (Planetary): Controls the total energy output of its home planet (approx. erg/sec). Can control weather, earthquakes, and harness all wind/solar/volcanic energy.

Type II (Stellar): Harnesses the entire energy output of its star (approx. erg/sec), possibly via a Dyson Sphere.

Type III (Galactic): Controls the energy of its entire galaxy (approx. erg/sec).

HUMAN RIGHTS

The Constitution and Bill of Rights lists our rights and the **Universal Declaration of Human Rights** which most countries have agreed to **lists 30**. We who grew up in the USA take these for granted and usually refer to them as our freedoms: to live, dress, travel, vote, speak, have an opinion as we want, be secure and have a free press (media) Not formally stated having a decent standard of living, social security etc. listed in UDHR. Our Declaration of Independence stated. “all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness.” **Rights have**

to be maintained because there are many who would take them away. We have freedom of speech and opinion yet people are being fired and hurt because they stated an opinion. Sometimes they have to take it to a court. **We are losing freedom of speech because many are failing to honor our First Amendment**. We need to guard our rights and freedoms or risk losing them.

In Europe they bowed to the demands of the Muslims passing **laws that forbid "hate" speech** which in reality is a **ruse** to **prevent criticism of the terrorist religion**. Even members of parliament were fined for quoting commands in the Quran that say slay the non Ms. Yet the Ms were allowed to continue to teach their ideology that clearly approves of killing of non Muslims subjugating of women and wife beating and honor killings of women of which there are thousands every year.

A nasty **SECRET** they want to hide is **Women are denied equal rights in ALL Muslim countries** including right to leave her

husband and divorce without his agreeing and even rights to her own children. Christians are not allowed to build or attend their churches and No other religions are allowed. Human Rights are not recognized.

SECRET: **Muslim Ideology rejects the Universal Declaration of Human Rights accepted by every other religion in the world**. **But I say not all Ms are bad. Each has individual choice for their actions and can choose to do good**. We must demand they do so. If not let them be sent back to their former Muslim country.

The essence of rights and freedoms in the universe is that life is allowed to live, be free and develop to its maximum potential and happiness without harming intelligent life. There is high probability of advanced civilizations that have the advanced technology that could eradicate menaces. This is a hint on another alien SECRET.

The United States of America's major law of the land is the US Constitution. (this writer W. E. Arnold took an oath to defend it against all enemies and still abides by that oath today in his heart and soul.) Should the president not be performing his

duties properly there is both the legal and right way to remove him which is the Impeachment process. Should it fail it is repeatable. Assassination of a president is not only against our laws but wrong. If personally I had in my possession a high powered telephoto lens I could take a picture of him or Dolly Pardon at a concert all from a distance. If I had a high powered rifle instead I would not even aim it at him and certainly not pull the trigger even if ordered to do so for three reasons:1 because it is against our Constitution, 2 because it would be an illegal order and 3 because I believe it would be wrong. The same holds true for anyone else that should have the chance to harm any of our elected officials. Simply and rightfully we have a better American way of revolution that is our vote. But there is a serious upcoming problem regarding safety of public officials assassination wherein the killer is never brought to trial discussed above.

CONCLUSIONS

The Best solution to the world's social problems is to demand by law that no one shall cause harm to another and insure punishment to harmers.

It is best to Be prepared, vigilant, informed, give kindness, like in that great song Old Lang Syne. **Music you like brings much happiness.**

Help create a happy future spreading good ideas and doing good.

We need to bug Congress and state officials to fix things

like banning robo calls

who invade our personal lives with many calls, interrupting us causing many to just not answer their fones, having to force callers to leave a message wasting our time.

Our personal fones should be for personal use and not for mass marketing. Please call your officials insist they ban robo calls to personal fones because we want our personal fones back.

Our flag **stands for freedom with Liberty and Justice for all.** We Veterans served in this cause for us and others around the world and many of us continue to work against evil

and those who want to take your freedoms away. We fight for rule of law with law enforcement which protects your life and property.

Gather courage to speak the truth and stand up against wrong.

To see the right thing to do and not do it is cowardice.

We took an oath to defend our constitution against all enemies foreign and domestic. No one has ever relieved us of our duties under that oath.

This is still the land of the free because of us brave

who still stand up and speak up for our freedoms and against evil. That is the reason for this book & valuablesecrets.fyi

Never worry about who will be offended if you speak the truth. **Think about who will be misled, deceived or hurt if you don't**. People are dying for lack of health care and food. While congress gives themselves raises accepts big bribes and

rewards their rich buddies who own oil, medical, corps who are ripping us off.

SECRET: It appears Congress is really working for big money interests who rip us off at the gas pump and with high medical care and drug costs.

The biggest threats are the rich power seekers, including some corporations and groups, manipulators some whose names cannot be mentioned because of lawsuits and possibly aliens, the Chinese and soon perhaps AI. They do not care about we the people. They want to make themselves richer and more powerful and they have continually done that for decades.

Because of our inept leadership the Chinese and AI may soon have the real possibility of gaining more power perhaps enough to take over because soon they will have invincible unstoppable weapons we the people have no defense against.

People are dying. Vote greedy/inept officials out of office and until then bug them to do their jobs and fix things, call them, email them get in their face. **Demand they work for us**

not big money. Recruit others to bug them.

This is SERIOUS and for those who think this is not real look at the references in the book on secrets and be aware that there are many others such as Robert Cialdini in his book on "Influence Science and Practice" who like Professor Wesley Arnold the old watchdog have tried to bring awareness of clandestine manipulators and power seekers. We do not have full knowledge of their secret operations, actions and effects. It is up to the free thinkers, intellectuals and leaders

to learn about and act on potential threats to protect our freedoms. If they fail to protect us, we will become slaves or worse.

But there is hope that we can stop them from taking over. It will take awareness, vigilance, will and effort. If it is to be it is up to me and that is the my purpose and of this little book.

The light house doesn't know how many lives its light saves and **you will not know how many lives your light will have a good effect on.**

Be a Light. Even a little light may be just enough to show others a way out of darkness.

Little seeds lead to roots that split huge rocks.

All of the flowers of tomorrow are in the seeds of today.

Two ants from different ant hills accidentally bumped into each other, foolishly yielded to anger and started fighting. Soon other ants join in. They continued until both ant hills killed each other off. Completely

unnecessary as there is plenty of food for all to live happily in their area.

And thousands of years of human history also shows anger, greed and hate have resulted in needless suffering and death in a world that can provide life and happiness for all.

TO NOT PUBLISH THESE FACTS WOULD BE COWARDLY.

"**No one is more hated than he who speaks the truth**." Plato.

Stand up, with us veterans against wrong.

OUR LEGACY

We enter the world with nothing.

Nobody can take anything with them in the end, only their legacy remains.

Most people live for self only, leaving nothing. **Waste not time.** Time, Hope and Love are priceless.

Kindness and Friendship are the most valuable gifts and cost nothing. A Smile and a few Nice words can brighten a day, sometimes even save a life.

Leave a legacy of good deeds and useful accomplishments because you can't take anything with you when your heart stops which happens often too soon and unexpectedly.

There are some who leave legacies of good deeds and work of great value that even after they are gone their good work remains.

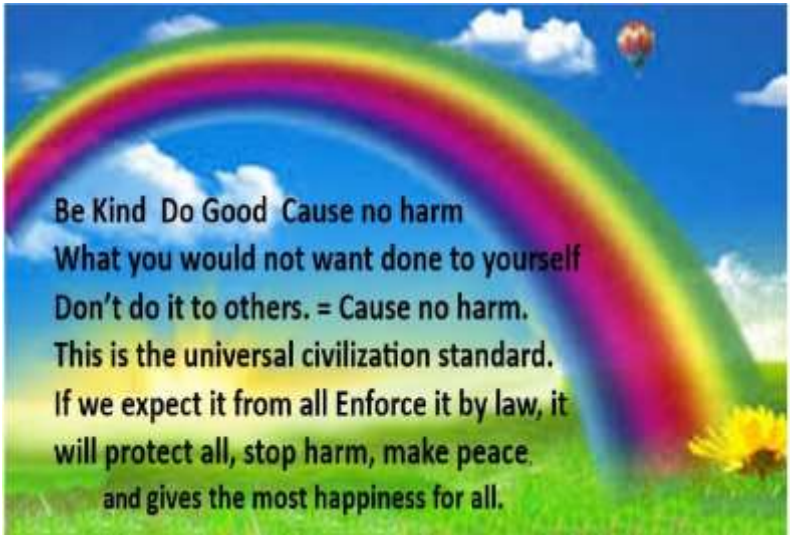
What will be our legacy?

We all need to keep informed and aware of everything that may affect our health and safety.

We need to stop stop harmers.
Demand our public officials act to fix problems. Call them.

The **best solution** to the world's human social problems is for everyone to **always only do as they would want to be done to themselves**.
In other words: **Be Kind, Do Good Cause no harm**.
What you would not want done to you, don't do to others.

This is the universal intelligent civilization best ideal standard.



Be Kind Do Good Cause no harm
What you would not want done to yourself
Don't do it to others. = Cause no harm.
This is the universal civilization standard.
If we expect it from all Enforce it by law, it
will protect all, stop harm, make peace
and gives the most happiness for all.

If we demand and expect it from all, enforce it by law, it will protect all, stop harm, make peace, and this gives the most happiness for all. This is the Best Solution to the world's social problems

I am for Human Rights including **equal rights for women** and for unlimited freedom of speech and preserving history. **I am not against my peace loving M neighbors.**

I am looking for others who care, so rare, to discuss, help, create a better life for all. Visit Facebook group Warren News. **bestideas.fyi**

I would like to hear from you about improving this book, what I missed and your ideas.

MAINTAIN OUR FREEDOMS
STOP THE SUFFERING & DYING
CREATE AMPLE FOR ALL
PRACTICE LOVE & KINDNESS

For our devout Christian friends I will honestly say I do not agree with everything in the Old Testament but do agree with and follow my hero **Jesus of Nazareth as the most outstanding example of behavior, who taught Love One Another and Do unto others as you would have others do unto you.**

We have the resources to provide everyone with ample clothing, food, affordable housing, medical care and education. Bug officials to do this now no excuses.

Enjoy America the fun relaxing way by rail. Lay back watch ever changing scenes of America, enjoy great meals, sleep. Amtrack sometimes has a sale on its USA 30 day anywhere pass for $249.

Enjoy rainbows which symbolize hope after a storm. Enjoy nature and travel

We Thinkers are looking for others who would like to:

See new technology,

In Iran 22 year old Mahsa Amini was **killed** Sep 16 2022 **over her head covering**

Universal Declaration of Human Rights lists 30 rights get it online.

M law book you can buy is Reliance of the Traveler: Classic Manual of Islamic Law 1997 They don't want Americans to have it.

I AM NOT AGAINST MY PEACE LOVING M NEIGHBORS **I am for equal rights for women and girls and non-Muslims which Islam is secretly against. 13 year old Aisha Ibrahim Duhulow was slowly and painfully Stoned to death publicly for being raped 27 Oct 2008 Around 50 M men participated in the stoning, throwing rocks at her head**

Amnesty International Women's rights are human rights!

We are all entitled to human rights. In Iran there have been hundreds of killings of peaceful protesters and torture including rape of detainees who were only peacefully protesting for women's rights.

The center for Inquiry.org stated In Islam men are the managers of women who are considered inferior and women are effectively stripped of their basic human rights forced to wear head coverings rendered rendering her anonymous, and a non -person. Human Rights Watch See their website for much more.

Knowing what to do if hearing an alert about an active shooter. Can save lives.

Active Shooter Advice from experts.
If a **terrorist or active shooter** is nearby, **Escape if possible, lock door, lights out fone on silent, be out of sight**. Tell those around you that if the terrorist comes in they can either do nothing and die, or get his gun down and get him down and all will live but it will take several people. See videos on Internet on this such as Run, Hide, Fight. Lock the door, and put chairs and other things in the doorway. If **Terrorist enters throw things at him to distract him**, Even a one second distraction gets you time to act to **push gun down**. This takes people out of target area. **Push behind his knee** (which causes knee to fold) **take him down one person on each arm and leg, then pile on top of him. Keep him down use all force necessary** to keep him down and get gun away. Put waste basket on top of gun. To not take gunman and gun out of action is a death sentence. See: Just Another Day:
